OAFABRIC | OVERVIEW

Build Vibrant African Digital Communities with an Advanced Interconnection Platform

O Afabric is a new, Africa-led interconnection platform, offering a range of virtual connectivity services from Open Access Data Centres (OADC) facilities.

Empowered by WIOCC's extensive digital backbone, O Afabric offers enterprises and service providers access to diverse digital ecosystems, supporting user-to-service, user-to-user and site-to-site connectivity.

Designed as a future-ready foundation, O Afabric unites cloud and local connectivity with OADC's market-leading colocation solutions, establishing an innovative, scalable African infrastructure platform that addresses both local and global digital transformation demands.

Platform Key Features

-  **One Port, Multi-Service:** Access various interconnection services delivered through a single port with multiple VLANs.
-  **Open African Ecosystems:** Connect to diverse digital ecosystems across OADC's African interconnection hubs.
-  **Local IX Exchanges:** Access leading community-led Internet Exchanges and fully managed IX Peering by OADC.
-  **Direct Cloud Access:** Seamlessly connect privately to public and local cloud providers to deliver hybrid and multi-cloud solutions.
-  **Portal Management:** Full visibility and control with O Afabric's intuitive portal, enabling real-time management from a single interface.

African Interconnection Redefined

OAFABRIC | INTERCONNECTIVITY

Solution Breakdown

 Hybrid IT	 Enterprises
 Virtual Connect	 ISPs / MSPs
 Internet Access	 Content / CDNs
 IX Peering	 Internet Exchanges
 Multi-Cloud	 Cloud Operators

Why choose OAfabric?

Scalable and Future-Ready: OAfabric offers a reliable, adaptable interconnection platform to support Africa's growing digital needs and hybrid infrastructures for local and global providers.

Seamless Cloud Access: Enabling secure, direct cloud connections, OAfabric supports data sovereignty and fosters local provider growth.

Integrated Premium Connectivity: Leveraging WIOCC's network, OAfabric provides IX peering, virtual interconnection, and tailored IP services for Africa's digital landscape.
